CONTENTS

Evaluation of steel corrosion by numerical analysis
Tatsuo Kawahigashi .......................................................... 17

Protective effect of L-alanine on copper- and a fragment
of amyloid β peptide-mediated neurotoxicity in PC 12 cells
Takeshi Minami, Yamato Sakamoto ................................... 23

Enthalpies of mixing for $R(+) \text{ and } S(-)$-2,2'-dihydroxy-1,1'-binaphthyl enantiomers in solution
Takayoshi Kimura, Takanori Matsushita ............................... 43

Talks given at RIST Colloquium ...................................... 87

Annual Reports of RIST .................................................... 89
Talks given at RIST Colloquium
Annual Reports of RIST

This report describes researches performed from April 2015 through March 2017 by researchers in RIST. Researches at RIST are primarily performed by members of RIST together with faculty members of Science and Engineering in Kindai University. In every two years, which is the director’s term of office, research projects are initiated and completed. The research projects in this term are as follows:

### Research Programs carried out during the period April 2015 – March 2017
